SCMC Regionalization Info Brief

Regionalization

- HQMC directed the establishment of a Regional-type, centrally managed infrastructure to consolidate all installation business management functions.

- The two CONUS regions are physically located at Camp Pendleton and Camp Lejeune.

Regionalization

- The Sub-Regional Commander at Camp Lejeune (General Dickerson) will be responsible for managing and funding base functions for the all East coast facilities, to include Blount Island Command and Base, Albany.
  - Blount Island Command is a unique entity in the Regionalization mix and final details have not yet been finalized with the Sub-Regional Commander for creating a small base structure.

Regionalization

- LOGCOM will maintain operational control over the BIC MPS mission and the Colonel assigned to BIC will have dual reporting chains; mission to LOGCOM and base to the Sub-Regional Commander.

- The Sub-Regional Commander located at Camp Pendleton will be responsible for base functions at Base, Barstow, so geography is an issue for LOGCOM's implementation of the Regionalization concept.

Regionalization

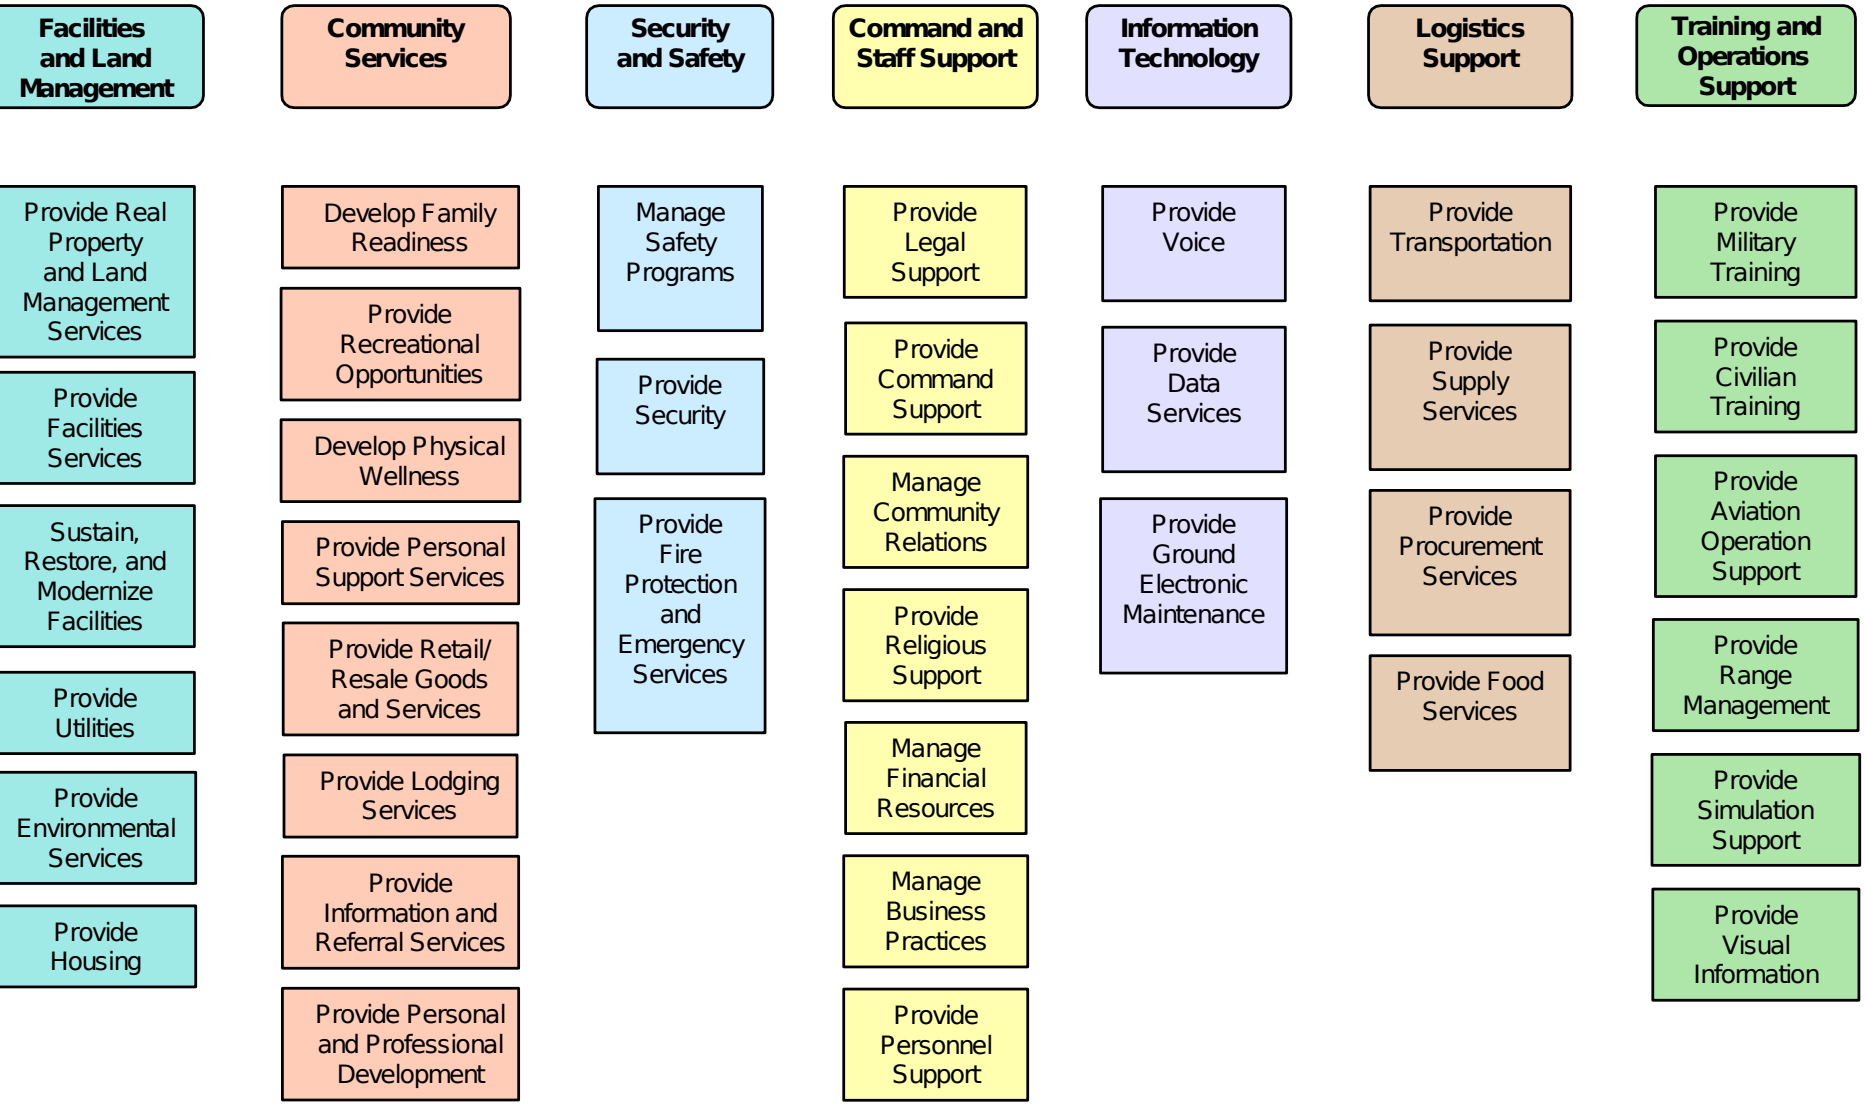
- The LOGCOM entities, including both the Maintenance Centers, will be tenants on Base Albany and Base Barstow respectively.

- As of 1 Oct 05, the MCLB Albany and MCLB Barstow Base Commanders will no longer report to General Williams as their first line supervisor. They will report directly to the respective Sub-Regional Commanders.
  - Col Lopez will report to MGen Dickerson
  - Col Thompson will report to MGen Lenhert

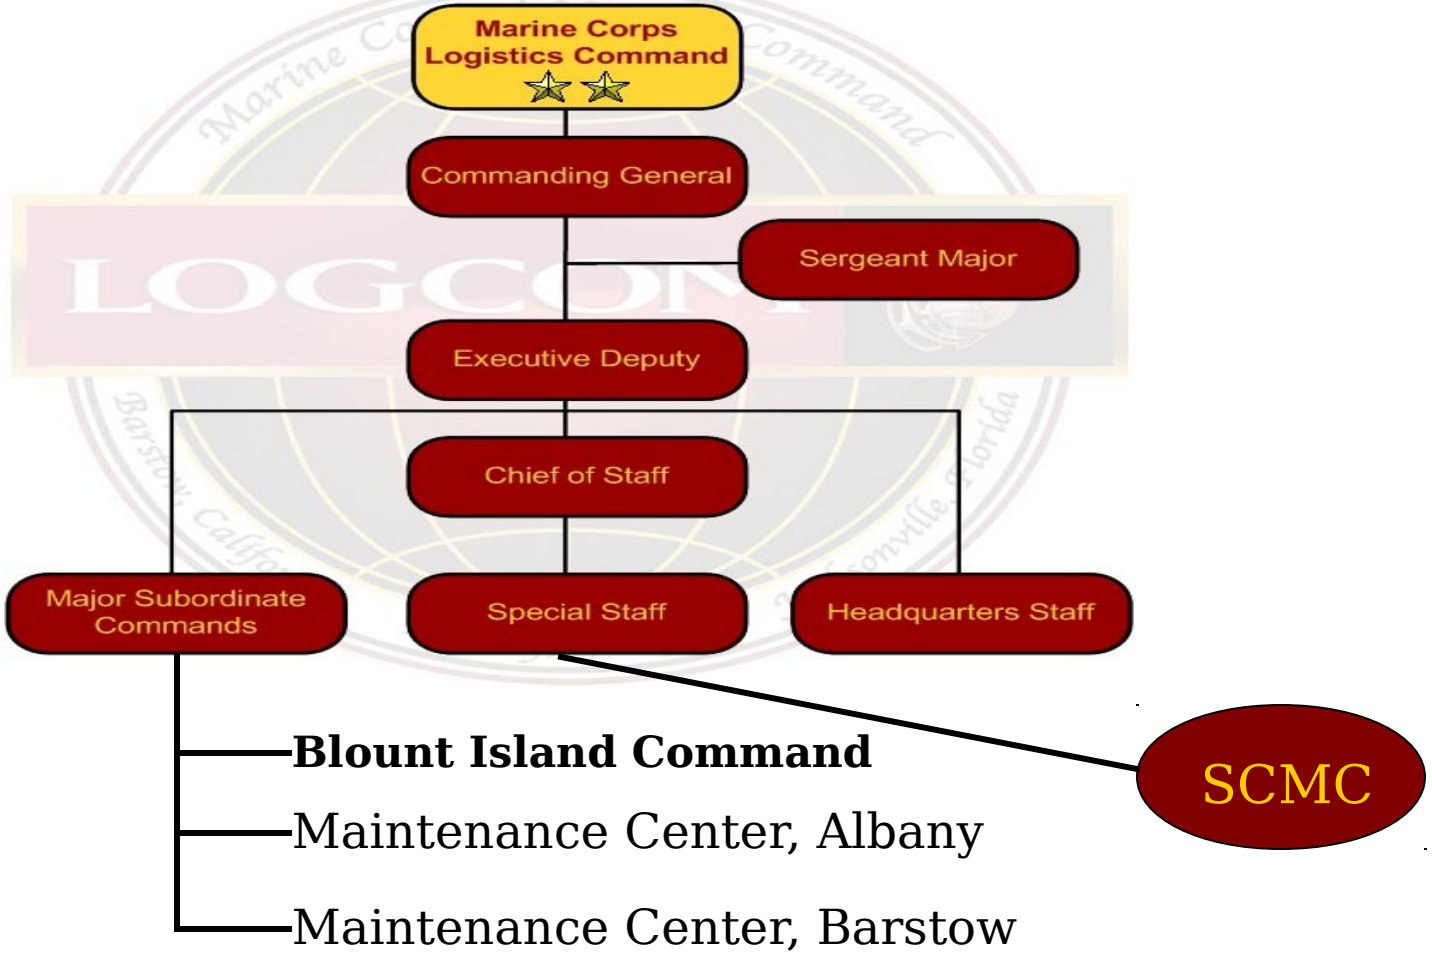
Regionalization

- The implementation was effective on 1 Oct 05.
- The Union has been informed of changes that impact the bargaining units.
- Minimal impact on SCMC employees.

Functions realigned to Base Regional Commands



NEW LogCom Organizational Chart



*Note: MCLB Albany and MCLB Barstow have been realigned to Base Regional Command.
